Data Analysis Project Peer Evaluation

1. **Which parts of the project were worked on by that member?**

    Mohit Khanna: was involved for setting up the project proposal and trying out different variants of the model by performing Outlier diagnostics, Transformations, Polynomial regression, Model selection.

    Eric A. Scuccimarra: was involve in doing exploratory data analysis for the project and also contributing to different stages of modelling , analysis and multiple other tasks, he actively did research in finding the dataset and setting up other logistics for the project.

    Shikhar Khanna: was involved performing the model analysis specifically trying out multiple modelling strategies , working with dummy variables ,adding interactions and performing various model diagnostics. He also was actively involved in data discovery for this project.

2. **How well that member communicated with the team (Provide a score from 0 to 100 as well as written comments.)?**

    Mohit Khanna: (100), was involved actively in setting up the milestones, communicating between different members and providing timely response.

    Eric A. Scuccimarra: (100), actively involved in all the conversation and communicating the work and providing deliverables.

    Shikhar Khanna: (100), contributed well to the success of the project, was available for all the discussions and actively participated in the activity.

3. **How well that member understood the course concepts (Provide a score from 0 to 100 as well as written comments.)?**

    Mohit Khanna: (100), since the work involved trying out with different foundational concepts , the analysis conducted by him and the participation in the discussions showed that he had good grasp of concepts

    Eric A. Scuccimarra: (100) the work done and the involvement during the different decision points that we made during the project clearly showed that he had a good sense of all the concepts that were taught in class

    Shikhar Khanna: (100) the work done and the suggestions provided really showed that the person had a good hold on the course concepts.

4. Proportion of the project completed by that member (Provide a proportion from 0% to 100% as well as written comments.)?

    Mohit Khanna: (30%) majorly involved with project proposal and some parts of modelling.

    Eric A. Scuccimarra: (35%) majorly involved with doing EDA and setting up the report as per the project guidelines.

    Shikhar Khanna: (35%) majorly involved with the data discovery and some parts of modelling process.
